More Than Half, Less Than Half

These phrases are useful to describe and summarize data:

Almost all the data…

Very few of the data…

About half the data…

More than half the data…

Less than half the data…

Keisha shared her data with her class.

The teacher asked, "What can you say about the places that third graders like to play?"

Here are some of the students' responses.

Very few of the students prefer to play inside.

About half of the students prefer to play at a playground.

Less than half of the students prefer to play at a sports field.

Almost all of the students like to play outside, either at a sports field or at a playground.

How would you describe the places where these third graders like to play?
